

E-Commerce Sales Insights Dashboard

Executive Summary

The E-Commerce Sales Insights Dashboard is a Business Intelligence solution developed to analyze sales performance, profitability, customer behavior, product performance, and operational efficiency for an e-commerce organization.

The dashboard enables management teams to monitor key business metrics and make data-driven decisions to improve revenue growth, customer satisfaction, and profitability.

Business Objective

The primary objective of this project is to provide a centralized analytics dashboard that helps stakeholders answer critical business questions such as:

- Which products generate the highest revenue?
 - Which categories generate the highest profit?
 - Which regions perform best?
 - Which customer segments contribute most sales?
 - How do payment methods impact sales?
 - What operational issues affect delivery performance?
-

Dataset Overview

The dataset contains transactional sales records including:

- Order ID
- Customer Information
- Order Date
- Region and Location
- Product Category
- Product Name
- Quantity Sold
- Sales Revenue
- Cost
- Profit
- Payment Method
- Shipping Mode
- Delivery Status

The data was cleaned, validated, and transformed prior to dashboard development.

Key Performance Indicators

Total Sales

\$1.25 Million

Represents total revenue generated during the reporting period.

Total Profit

\$218.6 Thousand

Represents total profit earned after deducting costs.

Total Orders

5,842 Orders

Represents total customer transactions completed.

Average Order Value

\$214.36

Average amount spent per order.

Profit Margin

17.46%

Measures profitability as a percentage of sales.

Dashboard Components

Sales Trend Analysis

The monthly sales trend chart demonstrates continuous revenue growth throughout the reporting period.

Key Findings:

- Sales increased consistently month over month.
 - Highest sales recorded during May 2025.
 - Positive growth indicates strong market demand.
-

Product Category Analysis

Categories analyzed:

- Electronics
- Fashion
- Home & Kitchen
- Beauty
- Sports

Key Findings:

- Electronics generated the highest revenue.
 - Fashion ranked second.
 - Sports category showed the lowest sales contribution.
-

Regional Analysis

Regions included:

- North
- South
- East
- West

Key Findings:

- North region generated the highest revenue.
 - West region showed strong profitability.
 - East region presents growth opportunities.
-

Customer Segment Analysis

Customer Segments:

- Premium
- Regular
- New

Key Findings:

- Premium customers contributed the largest share of revenue.
 - Regular customers generated consistent sales.
 - New customers indicate customer acquisition success.
-

Profitability Analysis

A scatter plot was used to compare revenue and profitability.

Key Findings:

- Electronics delivered the highest profit.
 - Fashion maintained healthy profit margins.
 - Sports category requires optimization.
-

Payment Method Analysis

Methods Included:

- UPI
- Credit Card
- Debit Card
- Cash on Delivery
- Wallet

Key Findings:

- UPI was the most preferred payment method.
 - Credit Card represented the second-largest share.
 - Wallet transactions remained relatively low.
-

Delivery Status Analysis

Statuses Included:

- Delivered
- Delayed
- Returned
- Cancelled

Key Findings:

- Most orders were delivered successfully.
 - Delayed orders represent operational inefficiencies.
 - Returned orders impact profitability.
-

Business Insights

Revenue Drivers

Electronics emerged as the strongest revenue-generating category.

Profit Drivers

High-margin electronic products significantly improved profitability.

Customer Insights

Premium customers generated the highest revenue contribution.

Geographic Insights

North and West regions performed best across sales and profit metrics.

Operational Insights

Reducing delayed and returned orders can improve customer satisfaction and profitability.

Recommendations

1. Expand high-performing electronics inventory.

2. Launch targeted marketing campaigns in underperforming regions.
 3. Improve logistics to reduce delayed deliveries.
 4. Increase customer retention initiatives for premium customers.
 5. Optimize discount strategies to protect profit margins.
 6. Promote digital payment adoption through incentives.
-

Tools Used

- Tableau
 - Microsoft Excel
 - Data Analytics Techniques
 - Business Intelligence Reporting
-

Conclusion

The E-Commerce Sales Insights Dashboard successfully provides an executive-level view of sales performance, profitability, customer behavior, and operational efficiency.

The dashboard supports strategic decision-making and helps management identify opportunities for growth, profitability improvement, and operational optimization.
